DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 7 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7 lacks a clear frame of reference to "front" as orientation with respect to the vehicle is not claimed.

Claim 12 lacks antecedent to "the high-density panel", found in claim 10.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2, 10-11, 13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by

Ver Deutsche Metallwerke AG.

Art Unit: 3612

As to claim 10, the panels 7 and 5 are shown as metal, a high density material.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 3, 5-7, 8-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ver Deutsche Metallwerke AG.

Adhesive bonding of an insert within a foam material is not only common knowledge in the art, but an obvious expedient to secure.

Art Unit: 3612

As to claims 5-6, Ver Deutsche Metallwerke AG shows approximately 56 percent. The exact ratio of foam and recess is deemed to be a determination of a technician evaluated for each vehicle and weight to meet government standards.

As to claim 7, Ver Deutsche Metallwerke AG shows a front bumper. A rear bumper is deemed to be common knowledge in the art.

As to claim 8, applicant admits the use of this material in the prior art, hence It would have been obvious to one of ordinary skill in the art to provide this material in the current bumper to meet low speed impacts.

As to claim 9, the determination of density as also one of a technician.

7. Claim 4 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Ver Deutsche Metallwerke AG.

Process steps are not given patentable weight in a product claim (MPEP 2113).

8. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ver Deutsche Metallwerke AG in view of Glance.

It would have been obvious to one of ordinary skill in the art to provide in Ver Deutsche Metallwerke AG a sandwiched absorber as taught by Glance sandwiched by panels 64.

9. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ver Deutsche Metallwerke AG in view of Hale.

Art Unit: 3612

It would have been obvious to one of ordinary skill in the art to provide in Ver Deutsche Metallwerke AG a metal replacement of polyester sheet molded compound as taught by Hale as an equivalent in the art.

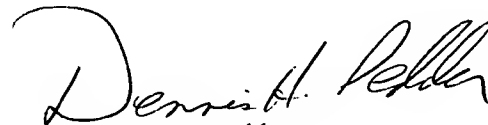

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Glance shows an absorber sandwiched between plates. The remaining references detail insert absorbers.
